The meeting was called to order, and on motion, A. G. Throop, Esq., was called to the chair, and E. W. Warner appointed Secretary. Several Vice Presidents were also appointed, whose names we did not get.

Mr. Throop, on taking the chair, addressed the meeting. He spoke of the project for a combination of the different roads in one depot, and compared the two projects, and their relative merits, and came to a very decided conclusion, that that which is known as the River route was the only feasible due, and advocated that route in preference to any other. The whisky commenced llowing and the crown-commenced "demonstrating" about 11 o'clock. One free fight came off in front of the National-Hotel before dinner, and the foundations were laid for two others, which culminated with fine effect during the progress of the speech. About soon the Chandlerville delegation, advertised to consist of four hundred men, came into town. It had dwindled to twelve persons. This was an average specimen of the outside delegations. Six or eight of the more submissiatic sovereigns. six or eight of the more enthusiastic sovereigns

Six or eight of the more entansistic sovereigns are enjoying the balmy weather in the watch-house. The Democracy you know are noted for displays of high art on great political occasions. The principal device of the day was a figure of the king of bessts, minus the mane, in place of which was an enormous frill, suggesting the Elizabethan era. This was entitled, "The Lion still living."

Whatever may have been Mr. Douglas' suc-

cesses elsewhere, his Beardstown effort was a complete break-down. His arrival in the city was an ample prognostication of his failure. He landed from the steamboat and entered a pecial carriage chartered to convey him two quares, to the National Hotel. The establish-ment broke down before reaching the top of the evee and spilled the little giant out. His audience to-day has been meagre of Democracy, and only applauded three times in a two hours' harangue. I went through the crowd two or three times during the speech. I am firmly of the opinion that one half of them were Republeans; and most of those with whom I converand said if Douglas would make four speeches in Cass County, they would pay him handsomely for it, and agree to beat him very handsomely to November. The Douglasites are dumbfounded at the littlemes of the alone. sad said if Douglas would make four speeches in Cass County, they would pay him handsomely for it, and agree to beat him very handsomely in November. The Douglasites are dumbfounded at the littleness of the giant, whem they took to much paiss to "tionize" on the canvas referred to above. Since the speech I have not much one man. Republican. Hard Democrat, or tracker of prominence, is expected (this evening. bill, and sighs for the lost merits of Henry Clay

men, waluable and interesting.

He could mended by an elaborate statement of what Mr. Lincoln would tell the people to-morrow. In making this statement he would avoid all personalities. He had been personally assailed by both Mr. Lincoln and Mr. Lincoln (he said) had charged oim with a conspiracy, an infamous conspiracy. Mr. Lincoln had connected the names of Franklin Pierce, James Buchanan and Chief Justice Taney with the same conspiracy. He (Douglas) had replied to that charge once, and he would reply to it again now. "It was," It give his exact language)." He was," It give his exact language? "He was an infamous lie." My recollection of Lincola's argument is, that the joint labors of Douglas, Pierce, Buchanan, Teney & Co., were so admirably matched, that we could his resist the presumption that they worked on a common and understood plan. Well, my opinion is, there is just as much plausibility, that Homer's Iliad was produced by shaking up the letters of the Greek alphabet in a basket, as that the Dred Scott decision was erected independently of the actag of the Locorotoo ringleadors during the past five years.

Secondly: Douglas drew from his pocket a copy of Senator Trumbull is marking a political speech behind his (Douglas') back! He then read a passage concerning the Tomoba' bill for the admission of Kanssa 1856—na which it appeared clearly to my mind that Douglas toen intended to long Kanssa into the Union without having her Constitution submitted to the people. Here the small giant lost his temper. In stead of denving the content of the content o -four povelties which you may have heard of.
I will give you a few items which struck me as

having her Constitution submitted to the people. Here the small giant lost his temper. Inspeech, he said: "The mise ed wretch! He would sooner have both his ments as those which he expressed in opposi-tion to and in denunciation of the Calborn heresies, which heresies now constitute the creed of the so-calle Democratic party, there Trambuli's making a charge behind Mr. Doug-las' back when it was possible to make it to his face. That he did not in this case omit making

any speech in Chicago—or did not first secure the State to find the little conspirator—was a shocking oversight, upon my word. And does it not seem that Mr. Trambull should feel en-couraged to hunt up Douglas in order to speak with him, after the latter has refused to speak with Luccin, and after the lif-success which at-tended his Trambull's he fillers to kerny Douglas. tended his (Trumbull's) efforts to bring Douglas up to the scratch in 1856?

Thirdly: Douglas read from a book in his handsomething which he acid was passed or adopted

by the Illinois Legislature in 1851, with only four dissenting votes. The language as he gave it was, that, "The people of each State and each Territory should be left by Congress to legislate for themselves, subject to no limitation whatev-er." I thought from the peculiar tone and mumbling is which this was pronounced, as well as from my knowledge of public opinion in 1851, that Douglas was telling a lie. I have now beto the hands of a band of Church crusaders, were strangled and their bodies afterwards hung up as a warning to the impious! What foll was from the same paper, is almost too horrible for the same paper in the same paper i

belief:

"We learn from creditable persons that in Thalpuj shu a Liberal (or one of the impious which is the same thing) fell into the hands of the men of the impious which is the same thing) fell into the hands of the men of the risk of the risk of the control of the men of the same thing) fell into the hands of the beautiful speciated, contemplating with an agelic joy the contortions and shricks of the unhappy man, who expired in the midst of the flames and bursting ilreworks."

But we have before us the evidence that the satherants of the Central Government or the Chirch are scarcely more b rbirous than the so-called Liberalists or professed friends of the people. The sames Vidsuri writes to Col.

JACK-ONVILLE Assust II, 1868.
The Fifth Annual Convention of American II structors of the Deaf and Dumb commenced its session in the Chapel of the Deaf and Dumb Agrium of Illinols at this place to day. There are ten States of the Union represented, and as the occasion is a most interesting one to all public spirited citizens, the Press AND TRIBURNS will, of course as usual, take the lead in spreading an out, line of its proceedings before its readers.

Since my last visit here to the Illinois Institute for the Deaf and Dumb, very great improvements have been made. The building is a most comfortable one, hardly equaled elsewhere in the West-Our Legislature has made noble provisions here for the mental and physical education of the unfortunate mate. As efficient corps of officers are connected with it, under the Superintendence of structors of the Deaf and Dumb com

It is now vacation with this Institution, and the pupils are all at their homes. The next session will open Septem ber 1st. Tuition, board, washing, lights, fuel, insteam and lighted with gas. Excellent bath-rooms are attached, in which pure cold water is rurnished from a well, pumped by steam, in great abun-dance, a great luxury to all its immates this warm weather. Each pupil has his separate clean bed, and every convenience for study is afforded, and at a trifling cost to the State, compared with expenses voted each session to less worthy objects.

The delegates in attendance on the Convention, and the States from which they came, are as follows:

An interpreter, Mr. Talbot of Ohio, had been appointed; and it was a most interesting scene, while the Doc or was speaking, to witness the deep feeling exhibited by those members who could hear his remarks-the bright and eager looks of the mates catching the whole meaning by the silent gestures of the interpreter, and the swift fingers of your phonographic reporter, Mr. Hitt, who accurately catches on paper every word that is uttered by all the speakers of the Convention. Such other portions of the proceedings here as may be interesting to your readers, I shall leave for him to furnish you. The whole of this large delegation are comfortably accommodated during the sessi n, at the Asylum, through the exertions of Mr. Gillet and his pleasant haly. The basiess is cotton during the nast week has almost been suspended, on foreign account, by the excitement attendant upon the announcement that "the Ablantic telegraphic cable has been successfully laid." Great anxiety exists in the cotton trade to see the working of the cable, as it mist cause considerable change in the mode of transacting business in future. The effect of this new agency will be the equalization of markets, and diminished chances for those serious losses which periodically occur in the liverpool cotton trade. A new system of purchasing to arrive, in Liverpool, by classification or sample, will soon be adouted, and there will be an increase of the transitu business in this city. New York will receive less cotton direct from the South, except from points where there is no other outlet, but her position as a cotton centre will be vasily improved by the receipt of

is no other outlet, but her position as a cotton centre will be vastly improved by the raceipt-of-orders from the manufacturers of England and France. Spinners and others in Europe will soon discover how much their interest can be served by the free use of the telegraph, and how admirably adapted the transit business of New York is in ordering botton to arrive with them at once, in a month, or in two or three months, thereby making a large saving in interest, and enabling them to secure at once a supply of the raw material, to fill even extensive contracts for goods and yarns. The transit business of this city has been found to work well for four or five years, and is now capable of great increase, and years, and is now capable of great increase, and it may not be too bold to predict that the day is not far distant when the bulk of the cotton trade between Europe and America will be transacted between Europe and America will be transacted in floating cargoes, represented by classification, through the agency of the electric telegraph.

The ekeptical portion of the business men on 'Change yesterday maintained their doubts of the final success of the cable, and only expressed their willingness to yield all their misgivings ustif dispatches are actually interchanged between London and New York. Others, more sanguine, believe fully in Mr. Field'a statements, and that all was right, and "progressing satisfactorily."

A mass convention will assemble at the same time, which will be addressed. ed by Mr. Lincoln and other distinguished speal ers. We have heard the names of Hon O. H. Browning, J. Grimshaw, A. Jonas and others mentioned in connection with the nomination. A writer in the Schuyler Citizen urges the nominal. tion of Col. Thomas S. Brockman, of Brown County. Either of these gentlemen will be ac-ceptable to the Republicans of the District, and be able to distance both Morris and Davis, the candinates of the two factions of the Democracy.

As between Moriss and Davis, the latter appears
to be gaining strength daily. Davis is an old
stager in the Democratic ranks, and knows personally almost every man, woman and child in the
District. He knows the ropes, too, and how to
pull them. The Schuyler Chinen has the following as to the set of the current in that County:

We are not political prophet enough to foretell precisely the result of this movement on the
part of Davis and his friends, but we can readily
understand, nevertheless, why it should blanch
the cheek, and palsy the nerves of those who
have dared to raise the puny arm of rebellion
in the camp of the undivided Democracy. We
find no inconsiderable number of democrats in
Schuyler, who are unwilling to torsake the
President they labored so realously to elect in
50. These will stand by Davis. The Morris
men of Schuyler therefore must not be surprised
next November to find a large vote on the poil
books in favor of the independent candidate
We are informed that a large vote will be polled
also in Brown County for the old line democracy,
and Hancock, as all know, always gives Davis a,
large vote.

Mr. Webster turned to him and said, "young man, it is the Ordinance of '87 which has made ill this difference."

The Frazer River Excliement on the Decline. Miscellaneous. A CHECK TO THE STAMPEDE PROM CALI-T EATHER DIRECT FROM THE BEST

Correspondence of the N. Y. Hersid,

SAN FRANCION, July In. 1869.

There can be no doubt but that the excitement respecting the gold discoveries upon Fraser and Thompson rivers, in the British possessions, is much leas now than it was two weeks ago. Letters upon letters have been received from parties, who, having failed immediately to accomplish the objects of their emigration, made their communications the reflection of their own individual feelings. These letters have been published extensively in the newspapers of this city and all over the State. The effect is as might be expected. A revulsion in public opinion has taken place concerning the mines, and where the fullest faith was beld of their richness and extent, incredulity and ridicule of the most of the control of th Leather of Superior Quality Which will be SOLD at a SMALL ADVANCE ON LEATHER DEALERS AND ROOT MAKERS N.B.—Country Orders carefully and promptly filled "at

where the fullest faith was beld of their richness and extent, incredulity and ridicule of the whole matter are now expressed. Several causes have united to bring about the change. This great majority of the journals published in California have waged a war ugainst the excitement, mainly to cheek the emigration which seriously threatened to deposulate the State. The inhospitable climate of Frazer River, the scarcity of provisions, and the difficulty of supplying the large number of miners with the necessaries of lite, the illiberal policy of the Hudson's Bay Company, which exercised a rigid monopoly of all trade, and the perils of river navigation, were all depieted with power and telling effect. Add to this the well known richness of the California mines, which at no time for the past ten years yielded with more abundance the precious metal. It was shown that there was room for four or five times the present number of placer miners, with chances fully equal to those already at work, who are now making first rate wages. Hills almost without number, in the interior of California, are known to be rich in gold, only waving to be bored to the have wither the except until wealth. There making first rate wages. Hills almost without number, in the interior of California, are known to be rich in gold, only wasting to be bored to be rich in gold, only wasting to be bored to be rich gold-bearing quartz—quartz that will pay and pay well—enough to employ an army of men for a life-time; and then the real developments of California would be only commerced.

Then, as to our agricultaral products, luxuriant erops everywhere abound; corn, potatoes and other regetables to be procured in vast quantities; soil rich, climate equal to the middest and healthiest in the world, and natural advantages that promise nefers long to place this

est and healthiest in the world, and natural ad vantages that promise oefore long to place thi State forward i: the path of advancement which her older sisters have travelled. The press in bored assiduously to disseminate these facts and to place before the eyes of our people the wast of judgment displayed in giving up-country like Uniformis, where everything was certain, for the less favored land north, where the search after gold could only be prosecuted in the face of a thousand dangers and difficul-ties.

in the face of a thousand dangers and difficulties.

Other causes besides those mentioned any mented the strength of the position taken and aby defended by the anti-Fraze-river-ites. No gold dast came down save what was forwarded to this city by the Hudson's Bay Companysome \$40,000—and that was pronounced to be California dust taken north by emigranis, who paid it away for provisions, and also partly received by the Company from their mines for twelve months. During the last ten days about two thousand Californians have returned to San Francisco, out of the twenty-five thousand who left since May, discouraged, and filled with in-

The steamer Commodore, formerly the Brother Jonathan, which left here on the 8th inst., for Victoria and France River, with about five hundred parsengers, returned a few days ago, having very narrowly escaped shipwreck. She accountered a service of the community of the state o

Mr. Corwin on Slavery. In his recent stump speech at Morrow, Ohio, dr. Corwin touched upon the question of slavery

Mr. Corwin touched upon the question of slavery extension. Among other things he said:

If his brother Republican did not want any more slave States, let him rote against further conquest. If his brother Democrat wanted no more slave States, let his party throw away that miserable trash of squatter sovereignty. Let us go on in the good old way, the revolution way, which was red with the blood of our fathers who trod it! Let us begin Territories in such a way that no slavery shall come into the State. It tell you, Mr. Republican, Mr. Democrat, there is no other constitutions, way. I am not going to take an oath to support and carry out that Constitution, and then go away and say, like a rascal, "To be sure the Constitution deesn't warrant this course, but I'll adopt it." Scoundrels and knares might do so and lay it to their conscience, but no honest man would. This is my view of the Constitution of the United States.

As to Guba, he said, suppose you have bought Cuba, the treaty comes be ore the Senate for ratification, and will it be ratified till you find what to do with it? The Southern man would admit it as it is. The Northern man would not admit it till the slaves were set free. And that ought not, I think, to be done without the consent of the owners, who were bought by na along with the ningers; and they of course would not consent. How, theh, are wet og et possession of Caba." We may send armies there to keep the peace and pay their expenses. But Cuba will not be a State nor a Territory, not even a Kansas. Rarey on "Blinkers." Rarcy on "Blinkers"

Mr. C. S. Rarey having been asked his opinion with regard to the use of "blinkers" on horses replies in a communication to the London Times, in which he states that his experience with and observations of horses, proves clearly that "blinkers" should not be used, and that the sight of the horse for many reasons, should not be sitterfered with in any way. Horses are only fearfal of objects which they do not understander are not samiliar with, and the eye is one of the principal mediums by which this understanding and this familiarity are brought about.

Contrary to current rumors, yesterday, the yards at Forty-lourth street were well filled with earlier than sorroing, and the total city recircle foot up pretty largely, viz: 4,311, against \$167 test week; 2,704 the corresponding week in 1657, and \$5,164 for the weekly average of all of last year. There was considerable dickering yesterday, but not many sales. Owners persisted in believing that there was to be a scarcity to-day, and put their prices fully up to last week a current rates; while buyers were chary of parchasing as the offering figures. three being received will be sainted with a sainte of 100 guns.

After the reception, Mr. Field and associates will be escorted by a procession of military and civil bodies of the city, to the Crystal Palace, where appropriate addresses will be made, and testimonials presented to Mr. Field, Capt. Hud son, and Capt. Dayman, of the Gorgon. Also, an address to the Felegraph Company.

The ceremonies at the Palace will be commenced by the vocal performance by the various Musical Nocjeties of "Achieved is the Glorious Work," and conclude with the Doxology, "Give praise to God."

Goshex, Orange Co., N. Y., August 14.—Last night, about hail-past nine o'clock, our village was alarmed by the intelligence that a most diabolical double murder had been committed at the house of Charles Reeve, in Hamptonburg, about two miles from here, on the Newburg dissolical doctice murder and oeen committed at the house of Charles Reeve, in Hamptonburg, about two miles from here, on the Newburg road.

Some 20 of our citizens immediately repaired to the scene, where they learned the following particulars: Mr. Reeve and his family were absent from home, leaving their house in charge of their servants, named Wm. Saunders, Peter Shoerech and Margaret Vrealy. It seems that Peter and Margaret were to be married next week, and they had been passing the evening together in the room of the latter. At about eight o'clock, as he was leaving Margaret's room, Peter was met at the door by William, who deliberately and without a word passing between either, shot him directly through the right nipple.

Peter turning back, opened the door through which be had passed, and tell dead across the threshold. The murderer then rushing into the room over the dead body of the first victim, shot Margaret through the left breast, the bail passing out behind just below the shoulder blade. She turned, and jumping out of the open window to the ground, some 20 feet or more, managed to crawl through the garden and orchard, nearly a quarter of a mile, to the house of Mr. Case, who immediately gave the alarm. The murderer has not been arrested or even seen since, but the whole country is aroused and searching for him. The woman is still alive, but cannot survive but a short time. Fire at the State Penitentiary.

Alton, Illinois, August 14th, 1858—About eight o'clock last evening, a fire broke out in one of the workshops, in the yard of the State Frison, in this city. Two of the workshops, the dining hall, Chapel, Hospital, Kitchen and swo or three other small buildings, were destroyed. A large emount in value of cooper's and other materials, were also destroyed. A large cooper shop, carriage and wagon shop, with stable and other outbuildings, were saved.

The main building, in which are the cells of the prisoners, and the residence of the Warden, being fire proof, was used jurged, but the heat was so intense that the councits had to be taken from their cells to save them from suffocation. Many of these lent their aid actively and energetically to arrest the progress of the flames and save the property; while others showed a spirit of insubordination, and attempted to escape, in which, however, none of them succeeded.

One fireman was severely injured, and two or three others slightly injured.

The value of the property destroyed will fall but little short of \$50,000, all of which is covered by insurance in Eastern oflices. The State loses nothing, as Messrs, Sanger and Caser, (the latter of whom is Warden,) had purchased the entire
